Wiring diagram

Functional principle

The pressure sensors from the P510 product series operate with fully welded metal measuring cells. As a result of the pressure acting on the metal substrate, a signal that is proportional to the pressure is generated and processed electronically. The processed signal is available either as a switching or an analog output with an accuracy of 0.25% of full scale. The rotatable sensor body and a variety

of process connections guarantee flexible process integration.

Mounting bracket; variable wrench size 24–30 mm; removable labeling plate 20 × 9 mm

Technical drawing of the FAM-30-PA66 mounting bracket. The drawing shows two views: a top view and a side view. The top view shows a rectangular plate with dimensions 24.0 mm by 30.0 mm. It features a central circular hole with a diameter of 10.0 mm (0.3937 inches) and four smaller circular holes with a diameter of 4.0 mm (0.157 inches). The side view shows the bracket's profile with a height of 15.0 mm (0.59 inches) and a mounting hole with a diameter of 4.0 mm (0.157 inches). The drawing includes various dimension lines and callouts in both millimeters and inches.
