| ID  | 100002995                          |
| Medium temperature                        | -30...+80 °C                       |
| Application area                          | Liquids and gases                  |
| Pressure range                            |                                    |
| Pressure type                             | Relative pressure                  |
| Pressure range                            | 0...250 bar                        |
|   | 0...3625.94 psi                    |
|   | 0...25 MPa                         |
| Admissible overpressure                   | ≤ 750 bar                          |
| Burst pressure                            | ≥ 1000 bar                         |
| Response time                             | ≤ 3 ms                             |
| Electrical data                           |                                    |
| Operating voltage U <sub>B</sub>          | 18...33 VDC                        |
| Short-circuit/reverse polarity protection | yes, cyclic / yes (voltage supply) |
| Capacitive load                           | 100 nF                             |
| Insulation class                          | III                                |
| Outputs                                   |                                    |
| Output 1                                  | Switching output or IO-Link mode   |
| Output 2                                  | Analog or switching output         |
| Switching output                          |                                    |
| Communication protocol                    | IO-Link                            |
| Output function                           | NO/NC, PNP/NPN                     |
| Accuracy                                  | ± 0.25 % FS BSL                    |
| Rated operational current                 | 0.25 A                             |
| Switching frequency                       | ≤ 300 Hz                           |
| Switching point distance                  | ≥ 0.5 %                            |

### Features

- 4-digit, 2-color (red/green), 12-segment display, rotatable by 180°
- Housing is rotatable after mounting the process connection
- Metal measuring cell
- Pressure range 0...250 bar relative
- 18...33 VDC
- NO/NC contact, PNP/NPN output, analog output (current/voltage), IO-Link
- Process connection G1/4" female thread
- Plug-in device, M12 × 1

### Wiring diagram

### Functional principle

The pressure sensors from the P510 product series operate with fully welded metal measuring cells. As a result of the pressure acting on the metal substrate, a signal that is proportional to the pressure is generated and processed electronically. The processed signal is available either as a switching or an analog output with an accuracy of 0.25% of full scale. The rotatable sensor body and a variety of process connections guarantee flexible process integration.

## Technical data
