IM-PROG Programming Adapter for TURCK Devices with PACT*ware*™ Programming

- **Adapter for parameterisation of TURCK *interfacemodul* series devices via the serial PC interface**

- **Galvanically isolated signal transmission**

The IM-PROG serves the parameterisation of TURCK *interfacemodul* series devices via the serial interface of a PC.

The *interfacemodul* to be parameterised is connected to the serial interface of the PC via the IM-PROG using the included connection cable.

The *interfacemodul* must be connected to the voltage supply for parameterisation.

IM-PROG converts the signal level and implements the galvanic isolation between PC and the *interfacemodul*.

Type	IM-PROG
Ident-no.	6890422
Connection	
– *interfacemodul*	3.5 mm jack
– PC	25-pole RS232 interface or via supplied adapter on the 9-pole interface
Cable length	1.2 m
Galvanic isolation	60 V
