Warning Avoid static charging	Warning	Avoid static charging
Mechanical data	Mechanical data	
Design Rectangular, Q80	Design	Rectangular, Q80
Dimensions 92 x 80 x 40 mm	Dimensions	92 x 80 x 40 mm
Housing material Plastic, PBT-GF30-V0	Housing material	Plastic, PBT-GF30-V0
Active area material PBT-GF30-V0, black	Active area material	PBT-GF30-V0, black

Features

- Rectangular, height 40 mm
- Active face on top
- Plastic, PBT-GF30-V0
- DC 2-wire, nom. 8.2 VDC
- Output acc. to EN 60947-5-6 (NAMUR)
- Cable connection
- ATEX category II 2 G, Ex Zone 1
- ATEX category II 1 D, Ex Zone 20
- SIL 2 (Low Demand Mode) acc. to IEC 61508, PL c acc. to ISO 13849-1 at HFT0
- SIL 3 (All Demand Mode) acc. to IEC 61508, PL e acc. to ISO 13849-1 with redundant configuration HFT1

Wiring diagram

Functional principle

Inductive sensors detect metal objects contactless and wear-free. For this, they use a high-frequency electromagnetic AC field that interacts with the target. Inductive sensors generate this field via an RLC circuit with a ferrite coil.

Technical data

Tightening torque fixing screw	4 Nm
Electrical connection	Cable
Cable quality	Ø 5.2 mm, Blue, LifYY, PVC, 2 m
Core cross-section	2 x 0.34 mm ²
Environmental conditions	
Ambient temperature	-25+70 °C
Vibration resistance	55 Hz (1 mm)
Shock resistance	30 g (11 ms)
Protection class	IP67
MTTF	6198 years acc. to SN 29500 (Ed. 99) 40 °C
Switching state	LED, Yellow

Mounting instructions

Mounting instructions/Description

Distance D	3 x B
Distance W	3 x Sn
Distance S	1.5 x B
Distance G	6 x Sn
Distance N	2 x Sn
Distance A	1 x Sn
Distance C	2 x Sn
Width active area B	80 mm

Accessories

Dimension drawing

Type IMX12-DI01-2S-2T-0/24VDC ID 7580020

Isolating switching amplifier, 2-channel; SIL2 acc. to IEC 61508; Ex-proof version; 2 transistor outputs; input Namur signal; ON/OFF switchable monitoring of wire-break and shortcircuit; toggle between NO/NC mode; signal doubling; removable screw terminals; 12.5 mm wide; 24 VDC power supply

Instructions for use

Intended use	This device fulfills Directive 2014/34/EC and is suited for use in areas exposed to explosion hazards according to EN 60079-0:2018 and EN 60079-11:2012.Further it is suited for use in safety-related systems, including SIL2 as per IEC 61508.In order to ensure correct operation to the intended pur- pose it is required to observe the national regulations and di- rectives.
For use in explosion hazardous areas conform to classification	II 2 G and II 1 D (Group II, Category 2 G, electrical equipment for gaseous atmospheres and category 1 D, electrical equip- ment for dust atmospheres).
Marking (see device or technical data sheet)	$\textcircled{\mbox{$\boxtimes$}}$ II 2 G and Ex ia IIC T6 Gb and $\textcircled{\mbox{$\boxtimes$}}$ II 1 D Ex ia IIIC T135 $^\circ C$ Da acc. to EN 60079-0, -11
Local admissible ambient temperature	-25+70 °C
Installation/Commissioning	These devices may only be installed, connected and oper- ated by trained and qualified staff. Qualified staff must have knowledge of protection classes, directives and regulations concerning electrical equipment designed for use in explosion hazardous areas.Please verify that the classification and the marking on the device comply with the actual application con- ditions.
	This device is only suited for connection to approved Exi cir- cuits according to EN 60079-0 and EN 60079-11. Please ob- serve the maximum admissible electrical values. After con- nection to other circuits the sensor may no longer be used in Exi installations. When interconnected to (associated) electri- cal equipment, it is required to perform the "Proof of intrinsic safety" (EN60079-14). Attention! When used in safety systems, all content of the security manual must be observed.
Installation and mounting instructions	Avoid static charging of cables and plastic devices. Please only clean the device with a damp cloth. Do not install the device in a dust flow and avoid build-up of dust deposits on the device. If the devices and the cable could be subject to mechanical damage, they must be protected accordingly. They must also be shielded against strong electro-magnetic fields. The pin configuration and the electrical specifications can be taken from the device marking or the technical data sheet.
Special conditions for safe operation	avoid static charging
Service/Maintenance	Repairs are not possible. The approval expires if the device is repaired or modified by a person other than the manufacturer. The most important data from the approval are listed.
