

BWA-2O2-002

Antenna

Technical data

Type	BWA-2O2-002
ID	3025644
Device type	Antenna
Frequency band	2.4 GHz
Dimensions	72 mm
Electrical connection	0.4 m
Antenna connection	RP-SMA plug
Tests/approvals	

Features

- External antenna
- 2 dBi gain
- Coaxial cable, 450 mm with RP-SMA connector
- Mechanical screw-in thread, 3/4" NPT
- Can be screwed directly into DX99...D... housing
- ATEX II 2G approval

Functional principle

Wireless devices with external connection require antennas. They are available with different gains to compensate possible losses resulting from the use of extension cables. We also offer special glass fiber antennas. They are perfectly suited for outdoor applications. The DX70 or DX80 devices are delivered with a 2.4 GHz antenna and with 2 dB gain (except devices with internal antenna).
