### Features

- Threaded barrel, M30 x 1.5
- Stainless steel, 1.4404
- For temperatures of -40 °C...+100 °C
- High protection class IP69K for harsh environments
- Special double-lip seal
- Protection against all common acidic and alkaline cleaning agents
- Suitable for applications in the food industry
- DC 2-wire, nom. 8.2 VDC
- Output acc. to EN 60947-5-6 (NAMUR)
- Terminal chamber
- ATEX category II 1 G, Ex Zone 0 at temperatures up to +80 °C
- ATEX category II 2 G. Ex Zone 1
- ATEX category II 1 D, Ex Zone 20 for temperatures from -25 °C to +70 °C
- SIL 2 (Low Demand Mode) acc. to IEC 61508, PL c acc. to ISO 13849-1 at HFT0
- SIL 3 (All Demand Mode) acc. to IEC 61508, PL e acc. to ISO 13849-1 with redundant configuration HTF1

# Wiring diagram

# Functional principle

Inductive sensors detect metal objects contactless and wear-free. For this purpose they use a high-frequency electromagnetic AC field that interacts with the target. The sensors hosting a ferrite core coil generate the AC field through an LC resonant circuit. Special versions are available for ambient temperatures between -60°C and +250°C.

# Technical data

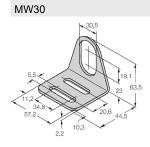

Terminal chamber cover material	plastic, Ultem
Terminal chamber housing material	plastic, LCP-GF30
Active area material	Plastic, LCP
Admissible pressure on front cap	≤ 10 bar
Max. tightening torque of housing nut	75 Nm
Electrical connection	Terminal chamber, Removable cage clamp terminals
	suited for M16 x 1.5 cable glands
Clamping ability	≤ 1.5 mm²
Environmental conditions	
Ambient temperature	-40+100 °C
	For explosion hazardous areas see in- struction leaflet
Vibration resistance	55 Hz (1 mm)
Shock resistance	30 g (11 ms)
Shock resistance Protection class	30 g (11 ms) IP68 IP69K
	IP68

# Mounting instructions

Mounting instructions/Description		
	Distance D	3 x B
	Distance W	3 x Sn
	Distance T	3 x B
	Distance S	1.5 x B
T	Distance G	6 x Sn
	Distance N	2 x Sn
	Diameter active area B	Ø 30 mm

#### Accessories

6945005 Mounting bracket for threaded barrel sensors; material: Stainless steel A2 1.4301 (AISI 304)

#### BSS-30

5

#### 6901319

Mounting clamp for smooth and threaded barrel sensors; material: Polypropylene

#### Accessories

Dimension drawing	Туре	ID	
	IMX12-DI01-2S-2T-0/24VDC	7580020	Isolating switching amplifier, 2-channel; SIL2 acc. to IEC 61508; Ex-proof version; 2 transistor outputs; input Namur signal; ON/OFF switchable monitoring of wire-break and short- circuit; toggle between NO/NC mode; signal doubling; removable screw terminals; 12.5 mm wide; 24 VDC power supply
	M16X1.5 PVDF CABLE GLAND	1634759	M16 × 1.5 cable gland, material: PVDF; with Viton O-ring; IP69K

# Instructions for use

Intended use	This device fulfills Directive 2014/34/EC and is suited for use in explosion-hazardous areas according to EN 60079-0:2018 and EN 60079-11:2012.It is also suitable for use in safety-re- lated systems, including SIL2 (IEC 61508) and PL c (ISO 13849-1) with HFT0 and SIL3 (IEC 61508) and PL e (ISO 13849-1) with redundant configuration HFT1In order to ensure that the device is operated as intended, the national regula- tions and directives must be observed.
For use in explosion hazardous areas conform to classification	II 1 G and II 1 D (Group II, Category 1 G, electrical equipment for gaseous atmospheres and category 1 D, electrical equip- ment for dust atmospheres).
Marking (see device or technical data sheet)	$\textcircled{\sc blue}$ II 1 G and Ex ia IIC T6 Ga and $\textcircled{\sc blue}$ II 1 D Ex ia IIIC T135 $^\circ C$ Da acc. to EN 60079-0, -11
Local admissible ambient temperature	ATEX category II 2 G electrical equipment -40+100 °C, cat- egory II 1 G -40+80 °C and category II 1 D -25+70 °C. The corresponding temperature classes are provided in the ATEX type-examination certificate. The device incorporates the custom-built /S97 and /S100 types.
Installation/Commissioning	These devices may only be installed, connected and oper- ated by trained and qualified staff. Qualified staff must have knowledge of protection classes, directives and regulations concerning electrical equipment designed for use in explosion hazardous areas.Please verify that the classification and the marking on the device comply with the actual application con- ditions.
	This device is only suited for connection to approved Exi cir- cuits according to EN 60079-0 and EN 60079-11. Please ob- serve the maximum admissible electrical values.After con- nection to other circuits the sensor may no longer be used in Exi installations. When interconnected to (associated) electri- cal equipment, it is required to perform the "Proof of intrinsic safety" (EN60079-14).Attention! When used in safety systems, all content of the security manual must be observed.
Installation and mounting instructions	Avoid static charging of cables and plastic devices. Please only clean the device with a damp cloth. Do not install the device in a dust flow and avoid build-up of dust deposits on the device. If the devices and the cable could be subject to mechanical damage, they must be protected accordingly. They must also be shielded against strong electro-magnetic fields. The pin configuration and the electrical specifications can be taken from the device marking or the technical data sheet. In order to avoid contamination of the device, please re- move possible blanking plugs of the cable glands or connec- tors only shortly before inserting the cable or opening the ca- ble socket.
Special conditions for safe operation	avoid static charging
Service/Maintenance	Repairs are not possible. The approval expires if the device is repaired or modified by a person other than the manufacturer. The most important data from the approval are listed.
