

Inductive coupler

Secondary side

NICS-M30-IOL2P8-0.3-RKC4.4T

- Threaded barrel, M30 x 1.5
- Chrome-plated brass
- DC 4-wire, 24 VDC
- 2 x PNP input
- Pigtail with female end M12 x 1
- IO-Link transmission

Functional principle

Inductive couplers transmit power and data contactless. With a high-frequency alternating field power is transmitted at a frequency of 200 kHz and data at 2.4 GHz. The powered primary component NICP feeds the secondary component NICS via the air interface which in turn transmits the sensor signals back to the primary component.
