Mounting instructions

Mounting instructions/Description

The image contains three technical diagrams illustrating different mounting configurations for the sensor. The top-left diagram shows a side view of a sensor mounted on a plate, with dimension T indicating the distance from the sensor's center to the plate's edge. The middle-left diagram shows two sensors mounted on a plate, with dimension G indicating the distance between their centers. The bottom-left diagram shows two sensors mounted on a plate, with dimensions N, S, D, and W indicating various distances and widths related to the sensor's position and the plate's dimensions.

The diagram shows a sensor mounted on a plate with a central hole. The sensor is positioned such that its active area is centered within the hole.

Distance D	32 mm
Distance W	18 mm
Distance T	32 mm
Distance S	12 mm
Distance G	36 mm
Distance N	12 mm
Diameter active area B	Ø 8 mm

All non-flush mountable uprox®+ threaded barrel sensors can be screwed to the upper edge of the barrel. In this mounting position, the sensor operates safely with a 20 % reduced switching distance.
