

# FCI-D20A4P-LIX-H1141

## Flow Monitoring – Inline Sensor with Integrated Processor

### Features

- Flow sensor for liquid media
- Calorimetric principle
- Adjustment via potentiometer
- LED band
- Operating range 4...30 l/min
- DC 3-wire, 21.6...26.4 VDC
- 4...20 mA analog output
- Connector device, M12 × 1

### Wiring diagram

### Technical data

| Design                                | Inline                               |
| Housing material                      | Plastic, PBT                         |
| Sensor material                       | Stainless steel, 1.4571 (AISI 316Ti) |
| Max. tightening torque of housing nut | 30 Nm                                |
| Electrical connection                 | Connector, M12 × 1                   |
| Pressure resistance                   | 20 bar                               |
| Process connection                    | G 3/4"                               |
| Flow state display                    | LED chain, red (1x), green (5x)      |

### Functional principle

The function of the inline flow sensors is based on the thermo-dynamic principle. Heat is generated in a measuring tube and absorbed by the flowing medium. The transported heat loss is thus a measure of the flow speed. Thus TURCK's wear-free flow sensors reliably monitor the flow of gaseous and liquid media. A low pressure drop and fast response to flow rate variations are the outstanding features of these devices.

## Technical data

|             |                  |
|-------------|------------------|
| LED display | red = 4 mA       |
|             | 1x green > 4 mA  |
|             | 2x green > 8 mA  |
|             | 3x green > 12 mA |
|             | 4x green > 16 mA |
|             | 5x green = 20 mA |

---

### Tests/approvals

|                        |         |
|------------------------|---------|
| Approvals              | cULus   |
| UL registration number | E210608 |
