Accessories
FDT/DTM HART Programming Adapter
IM-PROG

The IM-PROG is intended for the parametrization of TURCK devices with PACT*ware*™ via the serial interface of a PC.

For this, the interface module to be parametrized is connected via the IM-PROG to the serial interface of the PC, using the included connection cable.

The interface device has to be powered for parametrization.

The IM-PROG converts the signal level and implements the galvanic isolation.

Additionally, the parameters can be stored on the PC or printed.

■ PC adapter for programming of TURCK-PACT*ware* devices

■ Galvanically isolated transmission of signals

Type	IM-PROG
ID	6890422
Weight	116 g
