TN866-Q175L200-H1147 UHF Read/Write Device

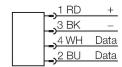

| Туре | TN866-Q175L200-H1147 | | |
|--|-----------------------------------|--|--|
| ID | 7030669 | | |
| Electrical data | | | |
| Operating voltage | 1224 VDC | | |
| DC rated operational current | ≤ 1000 mA | | |
| Data transfer | Alternating electromagnetic field | | |
| Technology | UHF RFID | | |
| Region (UHF) | Russia (866868 MHz) | | |
| Radio communication and protocol standards | ISO 18000-63 EPCglobal Gen 2 | | |
| Channel spacing | 200 kHz | | |
| Output power | 1 W (ERP), adjustable | | |
| Antenna polarization | RHCP | | |
| Antenna HPBW | 90° | | |
| Output function | 4-wire, Read/Write | | |
| Mechanical data | | | |
| Mounting conditions | Non-flush | | |
| Ambient temperature | -20+50 °C | | |
| Design | Rectangular | | |
| Dimensions | 200 x 175 x 60 mm | | |
| Housing material | Aluminium, AL, Silver | | |
| Active area material | Plastic, ABS, black | | |
| Vibration resistance | 55 Hz (1 mm) | | |
| Shock resistance | 30 g (11 ms) | | |
| Protection class | IP67 | | |
| Electrical connection | M12 × 1 | | |
| Power-on indication | LED, Green/Yellow/Red | | |
| Diagnostic display | differently adjustable | | |

Features

- Rectangular, height 60 mm
- ■Active face in front
- ■Plastic, ABS
- Device only suitable for operation in Russia (RUS) at 866…868 MHz

.../S2503 Connectors

.../S2500 Connectors

.../S2501 Connectors

Functional principle

The UHF read/write heads form a transmission zone, the size of which may vary depending on the combination of read/write head and tag used.

TURCK

Technical data

Packaging unit

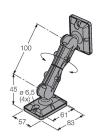

The read/write distances only represent standard values measured under laboratory conditions, free from any influences caused by surrounding materials.

Attainable distances may vary due to component tolerances, mounting conditions, ambient conditions and material qualities, especially when mounted in metal. Testing of the application under real operating conditions is therefore essential, especially with on-the-fly reading and writing! Due to the higher energy needs of the transponder for a write operation, the range is reduced to approximately 40–60 % of the reading range.
