

BL67 base module

1 × 7/8" Connector, 5-pin, Only Load Voltage

BL67-B-1RSM-VO

Tip	BL67-B-1RSM-VO
Tanit. no.	6827236
Housing material	Polycarbonate, flame resistance (PC V0)
Muhafaza rengi	gri (RAL 7015)
Tightening torque fixing screw	0,9...1,2 Nm
DIN rail mounting	yes, Attention: Offset
Direct mounting	Two mounting holes, 6
Konektör A	Erkek flanş, 7/8 inç-16 UN, Vidalanabilir
Flange housing	metal, CuZn, Nikel kaplama
Contact carriers	plastik, TPU, Siyah
Kontaklar	Metal, CuZn, Altın kaplama
Screw-in thread seal	Plastic, NBR
Insulation resistance	$\geq 10^9 \Omega$
İletme direnci	$\leq 5 \text{ m}\Omega$
Kirlilik derecesi	3/2
Pim sayısı	5
Ampacity	10A
Nominal voltaj [Umax]	250 V
Koruma tipi	IP67, yalnızca vidalarla sıkılmış veya takılı
Mekanik ömür	> 100 eşleşme döngüleri

- Güç besleme modülü için pasif bağlantı bileşenleri
- Kablolu durumda elektronik parçaların hızlı şekilde değiştirilmesi
- Mekanik kodlama, yanlış elektronik modüllerin yanlışlıkla takılmasını önler
- Koruma sınıfı IP67
- 7/8" connection technology
- 5-pin
- Field resp. load voltage supply
- 1 port

Kablo Bağlantı Şeması

İşlevsel prensip

The pin resp. signal assignment results from the combination with an electronic module. You find the pin configuration and the wiring diagrams on the data sheet of the corresponding electronic module.

BL67 base modules are connected to the right of the gateway, using two screws for each module. A DIN rail is not required. This way, a compact and stable unit is built. The unit can now be mounted on a DIN rail or directly on the machine.

The field devices are connected to the base modules which are available with different connection technology (M8, M12, M23 and 7/8").

Note

Further technical data like temperature range are determined by the electronic modules and can be found on the data sheets.
